

```
const Event = require('../models/Event');

exports.createEvent = async (req, res) => {
  try {
    const event = await Event.create(req.body);
    res.status(201).json({ status: 'success', data: event });
  } catch (err) {
    res.status(400).json({ status: 'error', message: err.message });
  }
};

exports.getAllEvents = async (req, res) => {
  try {
    const events = await Event.find();
    res.status(200).json({ status: 'success', data: events });
  } catch (err) {
    res.status(500).json({ status: 'error', message: err.message });
  }
};
// Add other controller methods for updating, deleting events, etc.
```
